✓ BJP4 Exercise 1.5: MuchBetter

Show Header

Language/Type: Java [basics](#) [classes](#) [escape sequences](#) [println](#)**Author:** Marty Stepp (on 2016/09/08)

Write a complete Java program in a class named MuchBetter that prints the following output:

```
A "quoted" String is
'much' better if you learn
the rules of "escape sequences."
Also, "" represents an empty String.
Don't forget: use \" instead of " !
'' is not the same as "
```

Type your solution here:

```
1 public class MuchBetter{
2     public static void main(String[] args){
3         System.out.println("A \"quoted\" String is");
4         System.out.println("'much' better if you learn");
5         System.out.println("the rules of \"escape sequences.\"");
6         System.out.println("Also, \"\" represents an empty String.");
7         System.out.println("Don't forget: use \\\" instead of \" !");
8         System.out.println("'\"' is not the same as \"");
9     }
10 }
```

This problem asks for a **complete program**. Write a complete Java program as a class with a main method. (You do not need to write any import statements.)
